Description

Cat's Eye® Tire Pressure Monitoring System (TPMS), 70 psi, 14-in. Stainless Hose, 4 Pack 6070BG00 from Link Mfg.

- Check tire pressure at a glance with this dual tire pressure equalization system
- For medium and heavy-duty trucks with 19 in.-21.5 in. tires
- Fits dual wheels or super single wheels (1 pair per axle)
- Designed to monitor and equalize tire pressure between two tires
- Internal check valve provides added safety by preventing both tires from going flat in the event of a leak, a blow out or when one of the pressure hoses is cut or broken
- One check point and one fill point per set of dual wheels
- Saves money on tires, fuel, and maintenance
- Spot underinflated tires easier
- Helps prevent CSA Violation

- Bright yellow "eye" of the Cat's Eye, opens up partially if tire pressure drops 5-6% below the recommended pressure setting in the tires connected to the Cat's Eye.
- Bright yellow "eye" opens completely if tire pressure drops 10% under the recommended tire pressure. The internal check valve is activated, isolating the good tire from additional pressure loss.
